PROFILE

Highly passionate Vocational School student specializing in Game Visuals, Technical Art, and Game Development. Excels at the intersection of logic and creativity, with proven experience crafting immersive real-time VFX, dynamic motion graphics, and robust gameplay systems in Unity and Unreal Engine. Driven to elevate overall gameplay experiences through stunning visual effects and seamless programming.

SKILLS

VFX & Motion Design

- Real-time VFX: Component-based effects, particle systems, and visual transitions in Unity & Unreal Engine.
- Asset & Texture Production: Blender (3D Modeling), Aseprite (Pixel Art), Adobe Photoshop (VFX Textures).
- Motion Graphics: Adobe After Effects (Logo animation, promotional materials, and kinetic typography).

Game Programming & Tech

- Languages: C#, Python.
- Systems & Architecture: Gameplay mechanics, interactive system prototyping, and UI/UX integration.
- Version Control: Git (Merge conflict resolution, repository management).

UI/UX Design

- Figma (Interactive Prototyping, Wireframing, User Flows, Layout Accessibility, Animation).

Soft Skills

- Agile Workflow (ClickUp & Coda), Communication, Pitching, Problem Solving.

EXPERIENCE & PROJECTS

Final Project - [Vanakala](#) (Ongoing)

2026 - Current

Game Programmer, VFX Artist

- **Core Gameplay Programming:** Developed and engineered core gameplay mechanics, including player controller physics, combat systems, and state-driven enemy AI using C# in Unity.
- **Systems Architecture:** Implemented modular and scalable architecture (such as ScriptableObjects) to manage game states, player progression, and inventory data efficiently.
- **VFX Integration & Tech Art:** Synthesized real-time visual effects with gameplay logic, managing dynamic game state transitions within Unity to ensure seamless player immersion and responsive game feel.

Multiple Game Jams ([Little Ocean](#), [15 Days Of Bargains](#), [Memory Leak](#), [Speak To Clean](#), [Glitchy Blox](#))

Tech Artist, Game Programmer

Created and iterated playable prototypes using Unity within a tight 48-hour development.

- **Rapid Prototyping:** Created and iterated playable prototypes using Unity within tight 48-hour development constraints.
- **Version Control:** Maintained clean version control management using Git to prevent merge conflicts and ensure seamless build deployments under pressure.

UI UX - [SortIt](#)

2025

Lead Motion Designer, UI UX

- **UI/UX Prototyping:** Designed intuitive user interfaces and developed interactive wireframes, focusing on seamless user flows and optimized layout accessibility.
- **Motion Graphics:** Engineered dynamic UI animations and smooth screen transitions using Adobe After Effects & Media Encoder to enhance user engagement and provide satisfying visual feedback.
- **Visual Experience Integration:** Collaborated to ensure a cohesive visual identity, bridging the gap between aesthetic motion design and functional user experience.

COMPETITION & ACHIEVEMENT

TOP 5 FINALIST– GUBUFEST 2026

Politeknik Elektronika Negeri Surabaya (PENS) - Game Jam & Pitching

- Served as the **Game Programmer**, implementing core mechanics.
- Served as the **Tech Artist**, creating custom Shaders and real-time VFX to elevate the game's visual identity.

TOP 5 FINALIST– DUC ANFORCOM 2025

Universitas Diponegoro(UNDIP) - UI UX, Motion Designer & Pitching

- **UI/UX Design:** Designed intuitive user interfaces and user experience wireframes, optimizing interaction layouts for the

project.

- **Motion Graphics:** Created high-fidelity motion graphics and animated visual assets using Adobe After Effects & Media Encoder to enhance presentation & UI value.
- **Project Pitching:** Spearheaded the final pitching phase, successfully presenting the project's design concepts and core mechanics to the judging panel.

INTERNATIONAL QUARTER FINALIST - GAMEJAMPLUS 2025/2026

GAMEJAMPLUS - *Game Jam & Pitching*

- Created Game Assets and Background Assets to improve game immersion.
- Showcased at the international awarding event in the Philippines to secure judge feedback.

EDUCATION

- SMK Raden Umar Said Kudus - Software and Game Development (PPLG) 2024 - 2027
